Boost your Revenue with Acer Health!!!

If you are looking for Medical Billing Services, then Acer Health is the right place to get you accurate billing services and revenue.

“Why medical billing can be a demanding and challenging task for small medical practices?”

Every doctor has a busy schedule with their patients and that time with patients is Very important. For Medical Billing you have to dedicate time and effort because you have to do follow up on account receivable (AR) and meet complex compliance issues. You have to spend more time to get updates on changes.

When you outsource medical billing you can spend more time on patients care and less on paper work.

So what are we providing you?

Out of Pocket Calculator:

Acer Health calculates the out-of-pocket cost for individual patients based on their individual insurance contracts. With accurate estimates at the time of visit, you can provide your patients with the cost-transparency they now demand. It's much easier to request payment when patients can see what they owe.

Shedding Costs on Statements:

A rise in patient balance has an associated relationship with increase in the collection cost. Acer Health facilitates your

office staff to collect the patients out of pocket expenses at the time of their visit. It not only reduces the statement costs but also increases the efficiency and cuts the delay in collection.

Easy Implementation:

We know you're busy and we want to enable you to begin immediately. Our implementation takes a few hours, not weeks or months. Acer Health ensures a seamless process at the front desk. Improve patient balances without disrupting your workflow.

Patient-Provider relationship:

Patient satisfaction is considered to be the crux of healthcare business and our goal is to narrow the bridge by providing transparency in this process, which will further strengthen patient-provider relationship. Apart from enhancing the revenue stream we aspire an impeccable improvement in the customer service follow-ups.

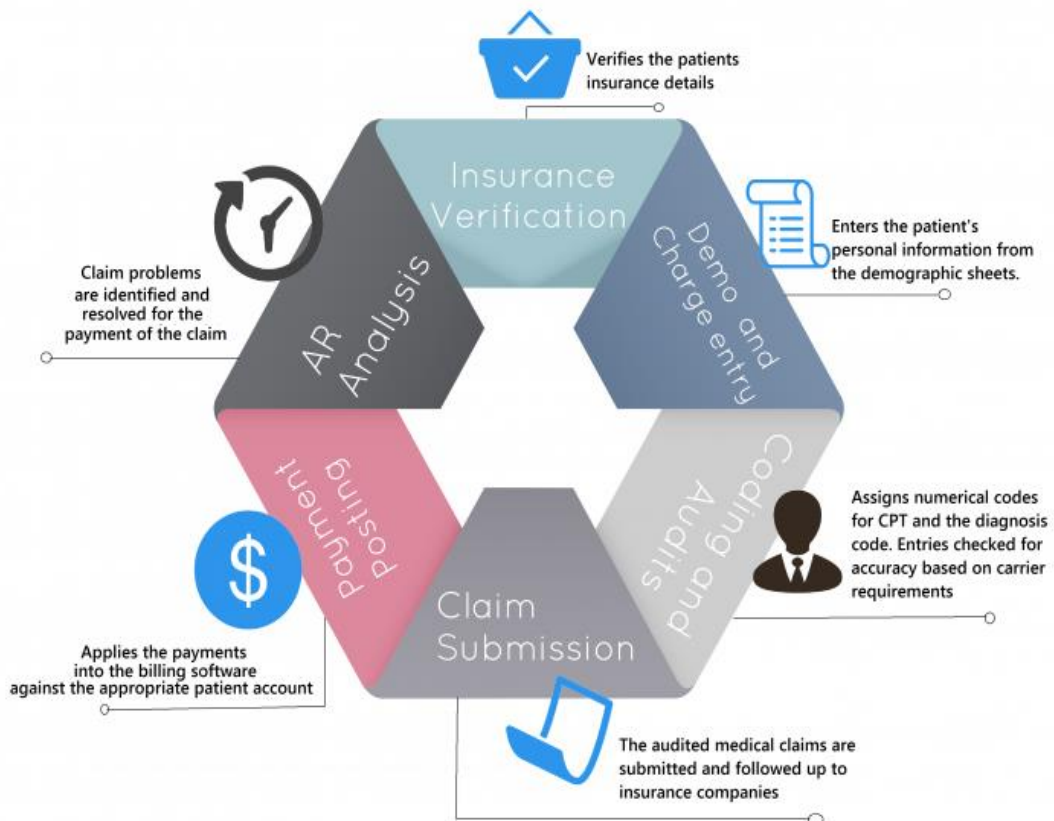

Increase Collection:

Showing patients what they owe not only sets payment expectation, it also creates an immediate opportunity to collect the payment when the patient is in the office. Avoid chasing balances later by beginning to close them at the front desk.

Responsive Support:

Murphy's Law was made for health care. We are a fully HIPAA compliant site and we have a full-time support team here to answer any questions you may have.

Revenue Cycle Management Workflow

Our Goal:

Acer Health Medical Billing Services' goal is to contain the costs involved in collecting insurance and patient payments, which includes the traditional method of sending claims, phone calls and commissions to collection agencies, and many more!

Our core Values:

- Integrity
- Innovation
- Quality
- Constructive Communication
- Build Long term Relationship
